

Quarter 1 2018 CHIP Update

The Yamhill County health community has come together for some great work, these past months! Below you will find a summary of the work accomplished in Quarter 1, which spanned from January 1st, 2018 to March 31st, 2018.

Thank you to all stakeholder organizations and individuals who continue to do this pivotal work! We at Yamhill CCO greatly appreciate the work you are doing to improve the health of the community. Please take a look below, at some of the great work being done in our community:

Goal 1: Chronic Conditions

- The Student Nutrition & Activity Clinic for Kids (SNACK) held their Breakfast for Dinner Workshop in March, in celebration of National School Breakfast Week. Participants built healthy heart granola and parfaits and learned about the importance of breakfast. 15 kids, 10 parents and 15 Linfield students participated. This is seen as a unique model for bringing together several groups in the community to learn together.
- YCCO continued its participation in the Sustainable Relationships for Community Health (SRCH) grant, alongside Yamhill County Health and Human Services, Virginia Garcia McMinnville, Physicians Medical Center and CareOregon, to promote community health improvements around Diabetes (DPP Program) and Colorectal Cancer (CRC Fit Kits and Community Promotion). County-wide CRC advertising and marketing will begin appearing in late May/early June.
- YCCO's CHW Hub continued work in managing and navigating the care of members with chronic conditions, by offering English and Spanish Diabetes Prevention Program options, as well as a pilot program with Physicians Medical Center, centered around boosting referrals into the CCO's DPP program. Yamhill County HHS is also offering on-site DPP classes.

Goal 2: Oral Health

- Capitol Dental Care began planning for an expanded-practice dental hygienist, to be performing services in non-clinical and physical health locations: Champion Team (a peer support program), Physicians' Medical Center (for pediatric patients), and WVMC (for pregnant people).
- YCCO's Early Learning Hub purchased bilingual oral health board books with info about good dental care for babies/toddlers, and will have the local home visiting network distribute them to their clients, paired with a brief educational portion and a survey to determine efficacy of that intervention.

Goal 3: Capacity of Primary Care Providers (PCP) and Medicaid Enrollment

- YCCO's evening CME sessions continued in Q1. The topics for this quarter were Provider Burnout/Mindfulness, Diabetes, and Trauma Informed Care. The sessions had 11, 10, and 32 attendees, respectively. YCCO will continue to offer these sessions throughout the year, on a variety of topics.
- Local provider groups have continued focused partnerships with YCCO to pilot projects around wrap-around care for high needs members, including

a project focused on cancer patient care. These projects also aim to address the Quadruple Aim element of Provider Burnout, by improving workflows and processes, to better support providers.

- YCCO and community partners are working with the Oregon Health Authority on development of new guidelines for loan reimbursement, and how to prioritize incentives to specific parts of the health care workforce in needed areas, such as Yamhill County.

Goal 4: Behavioral Health

- YCCO held a trauma-informed care event, the second part of its four-part series, on February 13th, on the topic of creating trust with clients. More than 75 people attended the first part of the event, which featured presentations by a Behavioral Health provider and a peer support specialist with lived experience with trauma. In the afternoon, key community members did site visits at two local agencies, with the consultants providing feedback on trauma-informed practices during walk-throughs of the agencies.
- Physicians Medical Center and Yamhill County Health and Human Services are partnering around a project to better integrate Behavioral Health care within the Primary Care setting.
- YCCO is working with clinic partners to further integrate the use of PreManage, to help manage patients with high Emergency Department use tendencies, as well as to better facilitate communication and wrap around care integration for members with Mental Illness.
